

# 1 Placement & Preparation

# Row composting step by step

Place composters in a row in a location not exposed to too much rain. (recommended flat surface, corner of terrace or balcony or garden)

Fill each Leave it Pot with dried leaves

If you do not have dried leaves add enough Remix Powder at the bottom.

# 2 Start putting waste in the 1st Pot

**1** Put kitchen waste in **Pot 1** in the row

**2** Add 3-4 fistfuls of powder on top of the kitchen waste fully cover the waste

**3** Cover with a sheet of newspaper like a inner lid to keep out fruitflies

*No need to stir daily when using Remix Powder*

# 3 Daily Activity

Lift the cover sheet of newspaper from Pot 1 in the row

Repeat steps 1-3 **1 2 3**

Cover with the **same** newspaper again

# 4 Keep it going

As you keep filling **Pot 1**, you may find white fungus, this is an indicator of effective composting.

When **Pot 1** is full, stir well add microbes, neem. Add more Remix powder if pile is wet and water if pile is dry. Pile needs to be moist.

Now start filling waste in **Pot 2**. When that is full, fill **Pot 3**, so on till you reach the last pot in the row.

Once in a week stir each Leave It Pot and correct moisture if necessary

# 5 Harvesting

By the time the last pot is full the materials in **Pot 1** should be composted and ready to harvest. Remove contents and store. **Prepare Pot 1** and begin putting in fresh waste following the process as before.

For best results Keep moist for another 1 month

Unless you sieve you will not get a powder consistency of compost. Sieve if you like and put the large pieces back into fresh waste. They will compost over time.

You can also use a bucket with holes to store nearly done compost

This instruction above is for 3 Pots in a Row composting.

For more homes you will need more than 3 Leave it Pots in a row. Shown on the right is a possible filling routine with Small LIP. (ex: For 10 kgs fill into 2 Small Leave it pots at a time and you will need 6 of them)

	2 Weeks	2 Weeks	2 Weeks
5 kg/day			
10 kg/day			
18 kg/day			

3 Small Leave it Pots = **1800 kgs** of organic waste kept out of landfill every year
